

Updates to the Manitoba HIV Program Primary Care Recommendations for Adults Living with HIV in Manitoba are pending.

In interim please see updated vaccine recommendations and eligibility criteria at <https://www.gov.mb.ca/health/publichealth/cdc/vaccineeligibility.html>

- Tetanus diptheria and acellular pertussis (Tdap) now replaces recommendations for tetanus vaccination for all adults every 10 years, see details at <https://www.gov.mb.ca/health/publichealth/cdc/vaccineeligibility.html#Tdap>
- Pneumococcal Conjugate Vaccine (Pneu-C-20) is now recommended for adults at high risk* of invasive pneumococcal disease including people living with HIV, see details at <https://www.gov.mb.ca/health/publichealth/cdc/vaccineeligibility.html#Pneumococcal>
